## HELLO WORLD !

This is the first word I have ever printed in every programming language I have learned. I am very passionate about programming, and I learned it the hard way. After that, I connected with some mentors and gained some knowledge, which helped me be part of some good projects in a short time.

I was very happy that some of the inputs were incorporated into live projects and made them successful. I believe working in any environment is a learning opportunity to learn new skills and make them useful for the company and myself. I also wish to share my knowledge with other team members and become a team player.

## EXPERIENCE

### BROTOTYPE PVT LTD

Kochi , Kerala

2023 - Present

FULL STACK DEVELOPER

Greater exposure to collective resources helped me find the missing block in my puzzle, which was a significant leap forward for my developer career. I had completed two major commercially viable products using Django and ReactJS as part of their designed curriculum. I had a great experience here.

### DXG SOFTWARE SOLUTIONS

Kochi , Kerala

2022 - 2023

FULL STACK DEVELOPER

I had the opportunity to work with skilled developers and learned a lot, which helped me grow from a beginner to a professional developer in this company. As an intern, I contributed to various projects, both small and large, and was even part of live projects. I began as an Android developer but later switched to working with Python Django and ReactJs. This company played a pivotal role in guiding me from being a beginner to becoming a skilled developer.

## SKILLS

- Python Django
- React Js
- JavaScript
- HTML
- CSS
- My SQL
- MongoDB
- Adobe Photoshop
- Figma / XD

## EDUCATION

2018- 2022

B TECH CSE

APJ ABDUL KALAM UNIVERSITY

Musaliar College Of Engineering and  
Technology Pathanamthita

CGPA : 7.1

2017-2018

PLUS TWO CSE

BOARD OF HSE

Government HSE , Punalur

CGPA : 8.5

2015-2016

SSLC

KERALA STATE BOARD

St Stephens Hss Pathanapuram

CGPA : 10

# LANGUAGES

- English
- Malayalam
- Arabic
- Hindi
- Tamil

# MAJOR PROJECTS

## ■ ECOMMERCE WEB APPLICATION - DJANGO

I developed a finished e-commerce web application to develop my skills it has a number of modules, namely admin, user, otp ,cart, order management, payment integration, analytics, etc. I was able to totally understand the fundamental ideas and explore Django.

### TECHNOLOGIES USED

PYTHON DJANGO , HTML , CSS , GITHUB , AWS HOSTING , MY SQL , S3 BUCKET , RAZORPAY ,JQUERY , JAVASCRIPT

 <https://github.com/shamshadlive/electra-laptop>

 <https://electra.shamshadlive.com>

## ■ FLYER MARKETING SYSTEM - React Js

I developed a live project using React.js, using functional component modules including Redux, Axios, file upload, payment integration, and JWT authentication. The project involved several API integrations on the vendor-customer side that allowed vendors to add flyers, while customers were able to view approved flyers by the admin and share them. I was responsible for the end-to-end development of the project, from planning to wireframing and implementation.

### ■ TECHNOLOGIES USED

REACT JS, JSX, CSS , GITHUB ,AXIOS , MY SQL , INSTAMOJO , JAVASCRIPT

 <https://iwillfly.in/>

## ■ HOSPITAL MANAGEMENT SYSTEM PORTAL - DJANGO

Developed a hospital management system using Django. The system includes users to manage appointments and hospitals to manage doctors and appointments. Notable features included prescription management, login and registration for patients, doctors, and hospital administrators, email verification for each registration, and a user-friendly UI with Bootstrap. etc ...

### ■ TECHNOLOGIES USED

DJANGO , HTML , CSS , GIT , MYSQL , JAVASCRIPT , JQUERY

 <https://github.com/shamshadlive/Hospital-Management-System-Django-Framework>

 <https://hospital.shamshadlive.com>

## ■ PARENT CHILD WALLET & TRANSACTION TRACKING SYSTEM - ANDROID

I created an Android app that works as a wallet. It lets users transact money, track their kids' spending, and notify parents about transactions. Parents can add money from their bank accounts to the wallet and then to their child's. The app also acts as a second wallet, so we can send money from another phone without another SIM card or bank account. I got better at Android development and Java programming and learned a lot about making mobile apps.

### ■ TECHNOLOGIES USED

ANDROID JAVA ,
